

## L'Arche Uganda Jewellery Project

The Project started in 2006 with the help of Mandy Liedke and has grown stronger in the past 4 years. We trained seven young adults with disabilities and seven assistants in jewellery making. They learned how to use colours, shapes and various materials to produce wonderful pieces of jewellery.

The project has benefited the core members, who strengthened their concentration, motoric skills and confidence in themselves. However, the project is also beneficial to assistants, which are able to learn a new skill. Some of those assistants and core members have left now and taken these skills with them. We are glad to have many friends who love and buy our jewellery. The money from the project benefits the members of the community directly.

We are working hard to design new and exiting jewellery each time. The materials we use are glass beads, wooden beads and recycled paper beads. Our jewellery is fun and easy to wear.

We present you with our 2010 collection and encourage you to support L'Arche Uganda by ordering these wonderful pieces of jewellery.
